

EMI/RFI

Applications

All electronics equipments

Standards

Concerned equipments :
FCC, VDE, MIL-STD 461, GAMEG 13...

Description

- Filter connectors have been developed from standard specifications. They are interchangeable as to the mounting and intermateable with standard connectors of the same series.
- Different types of contacts can be fitted in these connectors : filter, non filter, ground contacts. The filter contacts attenuate signals in different frequency ranges from approximately 100 kHz.
- Capacitive and inductive components used for filtering are made of metallized ceramics and ferrites respectively. They have the shape of tubes inserted individually on to each contact, or planar arrays over all the connector contacts.
- Mechanical design and 100% testing carried out in production ensure a high level of quality to Souriau filter connectors.

Typical performance

capacitive filter

π network filter

Note : For filter selection, refer to the table of each series

General characteristics

- **Voltage rating :**
200 Vdc or 100 Vdc, according to filter type.
- **Current rating :**
5 A, 7.5 A or 13 A according to contact type.
- **Filters :**
capacitive, L or π filters from 100 pF up to 0.1 μ F.

Schematic diagrams

The mechanical concept is based on the shape of the filter : tubular or planar. Therefore two assembly methods are used.

Tubular filter connectors

Circular connectors fitted with tubular filters

Note : ferrite is not used in the capacitive filter

Planar array filter connectors

D-Sub connectors fitted with a capacitive planar array

D*J-SUB

Applications

Space, military, aeronautical

Standards

based on :

- MIL-C 24308
- NFC 93425/HE 501
- BS 9523 - N-001

Description

D*J subminiature filter connectors are designed for aeronautical, military and other environmental applications. A non-magnetic version for space applications is also available.

These filter connectors are directly based on the standard specifications : MIL-C 24308, NFC 93425 (HE 501) and BS 9523 - N-001. They are interchangeable and interchangeable as to the mounting with standard connectors of the same series.

For the high reliability range approved by the European Space Agency, please, report to the corresponding catalogue.

Characteristics

Mechanical

D*J connectors are fitted with tubular filters :

- Shells : copper alloy or steel, tin lead plated
- Insulators : self-extinguishing thermoset (UL-94-VO)
- Contacts : machined copper alloy, gold plated, 1.27 micron min gold over 2 microns min nickel on contact area
Contact retention force in insulator : 40N min

Environmental

Temperature -55°C → 125°C

MIL-STD 1344, method 1003, condition A - NFC 20714

Humidity 10 cycles 24 h - MIL-STD 1344, method 1002, type II except step 7 b - NFC 20703

Salt spray 48 h - MIL-STD 1344, method 1001, condition B
NFC 20711

Durability 500 cycles - mating/unmating

Vibration 20 g - MIL-STD 1344, method 2005, condition IV
NFC 20706

Shock 50 g - 11 ms - MIL-STD 1344, method 2004, condition E
NFC 20727

- Aeronautical

Standards

- 8TFLT : MIL-C 38999 Series I
NFC 93422 HE 308
DTAT C 5935 x 0001
- 8TFD : MIL-C 38999 Series III

Description

8TFLT and 8 TFD filter connectors are equipped with planar arrays filters. These connectors have the same length as the standard connectors of the same series so as to be directly interchangeable, and allow an easy implementation of the filtering at all stage of equipment development and life.

Characteristics

Mechanical

- Shells : aluminum alloy, olive green cadmium or nickel plated
- Insulators : thermoplastic
- Interfacial and peripheral seals : silicone rubber
- Contacts : machined copper alloy gold plated, 1.27 micron min gold over 2 microns min nickel on contact area
Contact retention force :
#22 : 45 Nmin - #16, #20 : 67 Nmin
